

Call Forwarding Instructions

:: LOCAL FEATURE DESCRIPTION :: Call Forwarding ::

Automatically forwards calls to any number you choose.

Calls coming to your phone are rerouted to any number you choose, even your pager or mobile phone.

How to use

To turn on, listen for dial tone. Press 72. When you hear dial tone again, enter the number to which you want your calls forwarded. If the number you're forwarding to is a Toll Free number, or a long distance call, dial 1, the area code and phone number. Wait for the line where you are forwarding calls to pick up then you can hang up. If they line is busy or doesn't answer, repeat the above process and it will be activated even if the

If you transfer calls to a location outside your local calling area, you are responsible for toll or long distance charges to wherever you are forwarding your calls.
